

# Sustainable Multi Asset Universal (AP 10 Year) SLP

## This investment has a volatility rating of 5

### Typically this means:

Higher volatility ratings have greater potential for higher investment returns over the long run. But, higher volatility funds are also more likely to suddenly fall or rise in value. Volatility is just one type of investment risk that you should consider when making investment decisions.

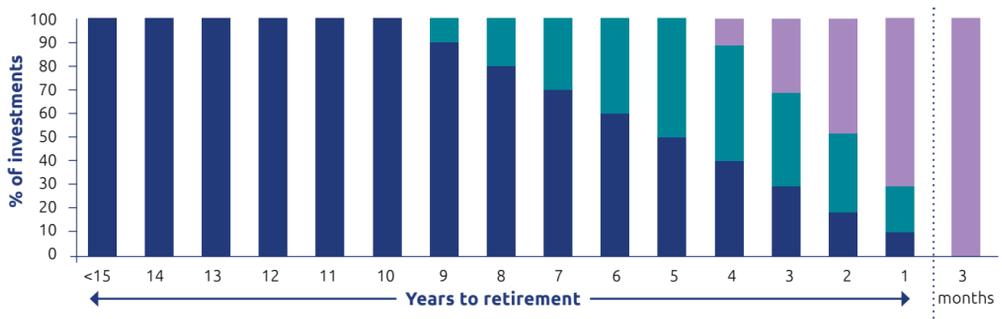

Please remember, the value of investments can go down as well as up, and may be worth less than what was paid in.

## It has a mix of investments

Investments are affected in different ways by different factors. What's positive for one investment can be negative for another, and when one rises, another can fall.

### This fund's diversification rating is 5

The fund's diversification rating is 5, so your investments are quite well spread across a range of investment types and countries.

### Why can diversification be a good thing?

Having a mix of investments across different geographical locations and investment types can help to smooth returns, meaning the value should be less likely to change dramatically than if you were invested in a single location or type of investment.

However, if you're planning to access your pension savings soon, being diversified may not be a good thing, depending on how you plan to take your money.
