Making the right choices

Choosing where to invest your money is perhaps one of the most important decisions you have to make when arranging your Active Money Personal Pension. How your chosen investment options perform has a major impact on your pension; so please take time to choose your investment options carefully, understand the risks and also take regular time out to review how they are doing. Your financial adviser can help you select and monitor your investment options. Remember, your plan is very flexible and allows you to switch investment options to suit your changing goals. If you do not have a financial adviser we can direct you to one, or we can provide limited guidance ourselves.

Remember to

- Take time to pick your investment options and understand the risks
- Take a look at the factsheets for the funds you're invested in to keep track of how they're performing – you can do this online at www.standardlife.co.uk
- Speak to your financial adviser regularly – they can help you keep your pension on track

Important information

Before making your investment choices please make sure you read the following information, which includes details of some of the risks you should be aware of.

- Before you decide to buy, you need to know what the risks and commitments are. Read our Key Features Document. It will help you decide if this product is right for you. If you're still not sure what to do, speak to a financial adviser or contact us. There's likely to be a cost for this.
- The return on each fund depends on the performance of the assets it invests in and the charges on the fund.
- The price of units depends on the value of the fund's assets after charges. This can go down as well as up, and your investment in the fund may be worth less than what was paid in.
- We review volatility ratings regularly and they can change over time.
- Some funds invest in overseas assets. This means that exchange rates and the political and economic situation in other countries can significantly affect the value of these funds. The value can go down as well as up, and your investment in the fund may be worth less than what was paid in.
- The asset mix that each fund invests in is continuously reviewed. It may be changed in line with developments in the relevant markets. Part of each fund may be held in cash and other money market instruments – see the Guidance notes section for more information.
- You'll probably be one of many investors in each fund you choose. Sometimes, in exceptional circumstances, we may have to wait before we can transfer or switch your investments. This is to maintain fairness between those remaining in and those leaving the fund. This delay could be for up to a month.
But for some funds, the delay could be longer:
It may be for up to six months if it's a property based fund because property and land can take longer to sell.
If our fund invests in an external fund, the delay could be longer if the rules of the external fund allow this.
If we have to delay a transfer or switch, we will use the fund prices on the day the transaction takes place – these prices could be very different from the prices on the day you made the request.
- Some funds invest in property. The valuation of property is generally a matter of a valuer's opinion rather than fact.
- You can change the mix of your investments as it suits you. But you can't invest in more than 12 funds at one time, 11 if you are invested in the Trustee Cash Account. In some situations there may be a delay in carrying out your fund switch requests.
- Transaction costs may apply when you switch in and out of funds. These will be taken into account in the price used to calculate the value of the funds on the day you switch and will vary depending on the type of fund. For example, a typical transaction cost for an equity fund is between 0.20% and 1.20% of the price you receive. But for property funds they can be much higher – up to 7% of the price you receive, or even higher in exceptional circumstances. This is because of the additional costs involved in buying and selling property, such as stamp duty.

- Some funds invest in funds managed by external fund managers. In these cases, the description of the fund is provided by the external fund manager so Standard Life can't guarantee that it's accurate.

External fund managers are in charge of managing their own funds including what they invest in. This means that Standard Life is not responsible for these funds' performance or continued availability.

The investment performance of the Standard Life version of a fund will be different from what you would see if you invested in the underlying fund directly. There can be several differences, due to charges, cash management, tax and the timing of investing.

- Some fund managers may look to get a better return by lending some of the assets from our funds to certain financial institutions. This involves some risk, and in certain circumstances, the fund could suffer a loss – for example, if the institution encountered financial difficulties and was unable to return the asset. The fund manager will use some controls to manage this risk, such as obtaining security from the borrower and monitoring their credit rating. External fund managers may also lend assets and are responsible for their own controls.
- Funds can sometimes use derivatives to improve portfolio management and to help meet investment objectives. A derivative is a financial instrument – its value is derived from the underlying value or movement in other assets, financial commodities or instruments, like equities, bonds, interest rates, etc.

There is a risk that a counterparty will fail, or partially fail, to meet their contractual obligations under the arrangement. Where a counterparty fails, the fund could suffer a loss. As part of the management of a fund, a number of controls can be used to reduce the impact of this risk, such as holding collateral and monitoring credit ratings.

Depending on how it is used, a derivative can involve little financial outlay but result in large gains or losses. Standard Life has control over the use of derivatives in its funds and external fund managers are responsible for their own controls.

- Charges are not guaranteed and can be altered in the future.
- The funds listed here were correct when this document was published. We cannot guarantee that all funds will be available when you make an investment.

Guidance notes

Which investment options are right for me?

Here's some more information to help you decide on the investment option(s) that might suit you. Learn about asset classes, investment approaches, different types of investments, volatility ratings and charges.

Asset classes

An 'asset class' is a category of investments, such as equities or bonds. Normally assets in the same class have similar characteristics. However, they can have very different returns and risks.

The value of the investments in any asset class can go up or down and may be worth less than what was paid in – there are no guarantees. Past performance is not a reliable guide to future performance.

Equities

What are they?

Equities are part ownership in a company, usually known as stocks or shares.

What's the potential return?

The return on equities comes from growth in the value of the shares, plus any income from dividends. For overseas equities, changes in the foreign currency exchange rates could also significantly affect returns.

What are the risks?

Equities are one of the more volatile asset classes – although they can offer good growth potential, their value can rise or drop sharply at any time. Because of this volatility, equities should normally be viewed as a long term investment.

Bonds

What are they?

Bonds are essentially loans to a government or company. These loans are often for a set time period and the bond owner usually receives regular interest payments. Bonds issued by the UK government are called 'gilts' and those issued by a company are 'corporate bonds'.

What's the potential return?

The return is a combination of any interest received and any change in the bond's value. For overseas bonds, changes in the foreign currency exchange rates could also significantly affect returns.

What are the risks?

A bond's return will be affected if:

- the interest or capital can't be paid back in full or on time
- the creditworthiness of the company or government reduces
- interest rates or foreign currency exchange rates change

Bonds can be traded on the stock market, so their value can go up and down at any time. Some bonds are riskier than others, e.g. bonds issued for a longer time period or by companies which are viewed as risky.

Money Market Instruments (including cash)

What are they?

Money market instruments include deposits with banks and building societies, as well as governments and large corporations. They also include other investments that can have more risk and return than standard bank deposits. There are circumstances where money market instruments can fall in value.

What's the potential return?

The return comes from any interest received and any change in the value of the instrument.

What are the risks?

Investments in these assets are riskier than cash deposit accounts – in some circumstances their values will fall. The return may also be lower than inflation.

Property

What is it?

Property investing includes direct investments in buildings and land, as well as indirect investments such as shares in property companies.

What's the potential return?

The return from a direct investment in property is a combination of rental income and any change in the property value. In comparison, the return on property securities can be similar to equities (see the 'equities' asset class description for potential returns and risks).

What are the risks?

The value of direct property is generally based on a valuer's opinion and is not fact. Property can take a lot longer to sell than other types of investment, so you might not be able to sell when you want to or get the price you were hoping for. Property securities, like equities, can have sharp changes in value at any time.

The values of different types of property do not necessarily move in line with each other. For example commercial property could be losing value even if house prices are going up.

Other

These are investments that don't fit into one of the other asset class categories. They include direct and indirect investments in real assets like commodities, for example oil or precious metals. They also include investments with specialist characteristics.

Standard Life uses asset classes to categorise our fund range. We categorise some funds as 'other' because they invest in more than one type of asset and therefore can't be categorised as any individual asset class. Alternatively, funds can be classed as 'other' because they don't meet the criteria of the recognised industry sectors or they haven't provided enough information to be categorised.

Investment approaches

Passive funds

A passive fund aims to track or replicate the performance of a benchmark (usually a market index or blend of market indices). The performance of this type of fund will be affected by the rise or fall of the market or markets it's seeking to track and any charges which apply. Charges are typically lower for passive funds than active alternatives. But as these funds aren't trying to outperform the markets they track, returns will usually be lower than their benchmark because of the impact of charges. You may also see passive funds called 'tracker' or 'index-tracking' funds.

Active funds

An active fund usually aims to achieve returns that are higher than a benchmark (such as the returns from a market index, cash/inflation, or the average return of other similar funds). The fund manager will try to outperform the benchmark by analysing potential investments to find the ones that they believe will provide higher returns over the longer term. Because of this, active funds are usually more expensive than passive alternatives. There's also no guarantee that returns will be higher than the benchmark.

Absolute returns

Absolute return funds usually aim to have a positive return regardless of market conditions. Their investment strategies vary widely, but they often use complex strategies that make use of derivatives. Risk and return will depend on exactly what the fund invests in, but in general absolute return funds can be expected to fall less than the wider markets when markets fall, but also to increase by less than markets when they rise. Although absolute return funds aim for consistent positive returns, there is no guarantee that they will achieve them, and the funds can fall in value. Absolute return funds may have different risks from other funds due to the derivatives that they use, and also because they may borrow, which increases potential returns and risk.

Fund types

Managed

These funds are normally managed by a single fund manager. The fund manager will choose the mix of assets that make up the fund (for example, how much to invest in equities, or bonds). Different funds will use different mixes of assets depending on their risk and return objectives.

MyFolio funds

MyFolio funds give you a choice of risk levels and investment styles. They include a diverse range of investments, such as stocks and shares (equities), bonds, property and money market instruments. They can also include other specialist investments to give even more diversification, reduce the likelihood of significant ups and downs in value, and help deliver returns.

The funds are managed by a team of investment experts at Aberdeen Standard Investments. This team can decide how much is in each type of investment to try to take advantage of any market opportunities they've identified.

MyFolio Market Funds: invest mainly in index-tracking (passive) funds from leading fund managers.

MyFolio Managed Funds: invest mainly in actively managed Aberdeen Standard Investments funds.

MyFolio Multi-Manager Funds: invest in actively managed funds from some of the leading fund managers across the world.

MyFolio Monthly Income Funds: invest in actively managed funds from some of the leading fund managers across the world. These focus on generating income, for example through share dividends, bond yields and property rental income.*

*Any income generated will be reinvested rather than paid out.

For more information about MyFolio Funds, and to receive a copy of the 'MyFolio Funds customer guide', please speak to your financial adviser or call us to discuss.

Please note that the value of investments can go down as well as up, and may be worth less than what was paid in. If you are unsure of which investment option(s) to choose you may wish to seek advice from a financial adviser. There's likely to be a cost for this.

Lifestyle profiles

Lifestyle profiles are investment options that are specifically designed to make it easy for you to save for retirement.

Once you're in a lifestyle profile, you don't need to do anything, although we do recommend that you regularly review your investments to make sure they're on track to meet your goals.

There are two main stages in lifestyle profiles:

1. Growth stage - usually when you're more than 10 years from retirement

Your money will be invested in funds that aim to increase the value of your pension over time (although please remember that all funds can go down as well as up, and may be worth less than was paid in – there are no guarantees).

2. Approaching retirement stage - usually when you're less than 10 years from retirement

Your money will gradually be moved into funds designed to prepare your pension pot for how you plan to take your money in the future. This will happen automatically – you don't need to do anything.

You should make sure any lifestyle profile you choose matches how you're planning to take money from your pension, whether that's setting up a guaranteed income for life (an annuity), taking a flexible income (known as drawdown), taking your money as one or more lump sums, or a combination of these. It's also important to consider when you'll start to take money from your pension pot as lifestyle profiles make changes to your investments based on your selected retirement date. As a result, they may only be suitable if you're planning to start taking money from your pension pot on this date. If you aren't sure how and when you should take money from your pension, or whether a lifestyle profile is suitable for you, you should speak to a financial adviser. There's likely to be a cost for this.

Standard Life's strategic lifestyle profiles

Our range of lifestyle profiles are called strategic lifestyle profiles (SLPs).

Once you've chosen the SLP that's most appropriate for you, a team at Aberdeen Standard Investments will:

- manage your money for you right up until you retire
- decide where you should be invested and when
- make sure the funds you're in don't take any more or less risk than they should

In the **growth stage**, your money will be invested in funds that aim to increase the value of your pension over time. Please remember though that investment growth isn't guaranteed. All funds can go down as well as up in value and may be worth less than the amount invested.

In the **approaching retirement stage**, your money will gradually and automatically be moved into funds designed to get your investments to where they need to be when you retire.

One of the features of the SLPs is flexibility. We can make changes to them at any time to make sure they continue to meet your needs, for example because of changes in legislation.

Our SLPs are designed to reflect the different ways you can take money from your pension.

- **Universal SLPs** – if you'd like the flexibility to take your money the way you want when you retire, or if you plan to take your full tax-free lump sum and use the rest of your pension pot to take a flexible income (known as drawdown).
- **Annuity SLPs** – if you plan to take your full tax-free lump sum and set up a guaranteed income for life (an annuity) with the rest of your pension. This option may not be suitable if you plan to set up an annuity that increases each year at a rate linked with inflation (an index-linked annuity).

- **Lump Sum SLPs** – if you plan to take all of your pension pot as one or more lump sums over a relatively short period.
- **Active Retirement SLPs** – if you plan to take your money as a flexible income through our Standard Life Active Retirement investment option.

You can see a list of the available SLPs in the strategic lifestyle profiles section later in this guide. For more details on the SLPs, including where they invest and when, read our 'Strategic lifestyle profile' guides (Universal, Annuity, Lump Sum and Active Retirement).

If you choose to invest in a lifestyle profile, you cannot combine this with any other lifestyle profile.

Volatility ratings

The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments.

Less volatile	0	1	2	3	4	5	6	7	More volatile
---------------	---	---	---	---	---	---	---	---	---------------

We regularly review volatility ratings for funds, and these may change.

We set ratings based on experts' judgement, using data on:

- how the fund price has varied from month to month in the past, compared to other funds available
- how investments in similar asset classes vary from month to month and the investment policy of the fund.

Typically, higher volatility ratings mean greater potential investment returns over the longer term. But high volatility funds are more likely to suddenly fall or rise in value. The volatility rating is not the only factor you should consider when selecting a fund. If you're not sure which funds to choose, please seek advice from a financial adviser. There's likely to be a cost for this.

Fund management charge

We apply a charge to money invested in our funds. This is known as the fund management charge (FMC) and is shown as an annual rate. However, we deduct the charge from each fund on a daily basis, which has the effect of reducing its unit price.

Additional expenses

Additional expenses may be deducted from some funds. They include items such as custodian, third party administration, trustee, registrar, auditor and regulator fees. Where a fund invests in other underlying funds, they may also include the underlying management charges. As the additional expenses relate to expenses incurred during the fund management process, they will regularly increase and decrease as a percentage of the fund, sometimes significantly. The additional expenses figure shown is the annual rate of the charge. But where additional expenses apply, they are taken into account when the fund's unit price is calculated each day.

If a performance fee applies to a fund, it is included in the additional expenses figure retrospectively. We have indicated funds where a performance fee may apply later in this guide.

All additional expenses figures shown are rounded to two decimal places. This means that although additional expenses may apply to some funds, they may show as 0.00% as we have rounded to two decimal places.

Total annual fund charge

The total annual fund charge is the FMC plus additional expenses.

The charges which apply to each fund are shown later in this guide.

Charges are not guaranteed. They are regularly reviewed and may be changed in the future. The information in this guide is correct as at January 2021. For the latest information, please go to www.standardlife.co.uk

Fund discounts

Each month we'll use the value of your plan, less any cash held on deposit in the Trustee Cash Account, to work out which discount percentage applies to you. We'll apply the discount by adding extra units to any qualifying fund you're invested in. Funds which don't qualify for a fund discount are highlighted within the table notes on pages 17 to 26.

Any amounts invested in funds that don't qualify for a discount still count towards your plan value when we work out the discount percentage that applies to you.

The table below shows the yearly rate of the discount.

Plan value less cash on deposit	Discount percentage
Under £250,000	0.3%
£250,000 – £499,999	0.4%
£500,000 +	0.5%

Where you can invest your money

Your options

Here are the main options available to you:

Strategic lifestyle profiles

You can choose from one of the strategic lifestyle profiles.

Details are in the [Standard Life's strategic lifestyle profiles section](#).

MyFolio

You can make individual choices from the range of MyFolio Funds based on how much risk you're comfortable taking.

Details are in the MyFolio Funds section.

Full fund range

You can make individual choices from the full Standard Life fund range.

Details are in the Full fund range section.

Before you choose a fund you should read the latest fund fact sheet. You can find them on our website at www.standardlife.co.uk/funds

Ready-made Investment Pathways

You can access your pension money from age 55 (will increase in the future).

When it comes to retirement, you've got flexibility about how you can take money from your pension savings. The choice is yours. However, everyone's personal circumstances are different. For you to make use of this flexibility and to allow you to spend your savings in a way that suits you, it's important to make decisions wisely about how to invest.

That's why we offer Investment Pathways. It's a range of ready-made options designed to reflect your retirement needs and make your decision simpler. So you can be confident you're invested in a way that's most suited to how you plan to take your money.

Making these kinds of decisions can be difficult and you might find it helps to speak to a financial adviser. Please note; there will likely be a cost involved for this.

Fund name and code

This gives the name of the fund and internal code used by Standard Life. Please enter both of these in full in the appropriate boxes when completing an application form. This will help us process your application.

The charges are not guaranteed. They are regularly reviewed and may be changed in the future. If you need more help to understand these tables, please see the Guidance notes section.

¹ Please see the Guidance notes section for an explanation of active/passive investments.

Lifestyle profile notes

For more information on the strategic lifestyle profiles, see the Guidance notes section.

If you are in any doubt as to which lifestyle profile you should choose, we strongly recommend you seek advice from a financial adviser. There's likely to be a cost for this.

It is not possible to invest in more than one lifestyle profile at a time. You can't combine a lifestyle profile with any other investment, but you can put money in the Trustee Cash Account if you choose a lifestyle profile.

The figures shown in this table reflect the charges of the most expensive fund in which the lifestyle profile invests. As you get closer to retirement, the investment aims of the lifestyle profile move away from growth and towards preparing your pension for how you plan to take your money. For more information on how our lifestyle profiles work and how long your investments are held in each fund, please see our 'Strategic lifestyle profiles' guides (Universal, Annuity, Lump Sum and Active Retirement).

Standard Life Investment Pathway Option 4 Fund: I plan to take out all my money within the next 5 years	GBMC	1	1.00%	0.01%	1.01%	Active

The charges are not guaranteed. They are regularly reviewed and may be changed in the future. If you need more help to understand these tables, please see the guidance notes section.

¹ Please see the Guidance notes section for an explanation of active/passive investments.

It is not possible to invest in more than one Investment Pathway Fund at a time.

For more information about Ready-made Investment Pathway funds, please see the Choosing investment options in retirement guide (Invinfo1).

Full fund range

Do you have a good understanding of investments and how assets perform? This could be the right choice for you. Read each fund's fact sheet for their aims and how they invest. You can find these at www.standardlife.co.uk

- You will need to build your investment portfolio from a number of funds.
- It is up to you to regularly monitor the performance of your funds and decide whether to make any changes.
- You may need to adjust your portfolio regularly to keep it in line with your investment profile.

Picking your own asset mix

It is very important that you pick an asset mix and build a portfolio that aims to meet your individual needs and your attitude towards risk. If you are unsure then you may wish to seek advice from a financial adviser.

You should think about investing in a variety of asset classes, and a range of investments within each class.

Are you approaching retirement?

If you are nearing retirement (for example if you are five years or less away), you may want to consider starting to invest in funds aimed at preparing your pension for how you plan to take your retirement income. Some funds have aims which are aligned to specific retirement income plans, such as buying an annuity, while others may be more suitable if you intend to take a flexible income (known as drawdown) or take all of your pension as one or more lump sums.

For example, if you intend to buy an annuity when you retire, you may wish to consider being invested in a fund that targets buying an annuity by the time you retire. And if you plan on taking a 25% tax-free lump sum, you could consider moving into a money market fund or funds.

If you are unsure where to invest, you may want to seek advice from a financial adviser.

The Trustee Cash Account

The Trustee Cash Account is available if you want to hold cash on deposit. It enables you to have cash available for investment opportunities, and to pay charges. For example, if you're not yet sure which funds you want to invest in, you can leave your money in the Trustee Cash Account until you're ready.

If you choose to invest in the Trustee Cash Account the interest is accrued daily and applied on a monthly basis. The rate of interest is normally 1% below the Bank of England base rate. Please give us a call for the latest rate on **0345 278 5626**. Call charges will vary.

¹ Please see the Guidance notes section for an explanation of active/passive investments.

² Fund is designed for use within a lifestyle profile. It is not designed to be bought in isolation by investors.

³ In order to achieve its objectives the fund utilises a combination of traditional investments (such as equities, bonds and foreign exchange) and advanced techniques where it can use derivatives extensively. Derivatives are financial instruments which derive their value from an underlying asset, such as a share or bond, and are used routinely in global financial markets. Used carefully, derivatives offer an effective and cost-efficient way of investing in markets. However, derivatives can lead to increased volatility of returns in a fund, thus requiring a robust and extensive risk management process. While the fund will not borrow cash for investment purposes, the total value of exposures to markets will routinely exceed the fund's net asset value. Derivatives may be Exchange Traded or Over the Counter (OTC).

⁴ A performance fee may apply to this fund and is included in the additional expenses figure.

Standard Life Active Retirement

These funds are for customers who are in retirement and are, or expect to be, withdrawing money from their pension (drawdown). See our webpages at: www.standardlife.co.uk/star for more information.

It is not possible to combine Standard Life Active Retirement with any other fund or lifestyle profile.

Standard Life Active Retirement

Fund name	Fund code	Volatility rating	FMC	Additional expenses	Total annual fund charge	Active/Passive investment ¹
Standard Life Active Retirement 1 Pension Fund	JJNA	4	1.00%	0.01%	1.01%	Active
Standard Life Active Retirement 2 Pension Fund	NNGA	1	1.00%	0.51%	1.51%	Active
Standard Life Active Retirement 3 Pension Fund	GGBG	2	1.00%	0.36%	1.36%	Active

The charges you'll pay for Standard Life Active Retirement depend on the charges of the underlying funds (or pots) and how your money is split between them. These charges will vary over time as you move through the pots and if additional expenses change. Charges may also include a service charge to cover the overall management and servicing of Standard Life Active Retirement. Charges are not guaranteed. They are regularly reviewed and may be changed in the future. If you need more help to understand these tables, please see the Guidance notes section.

¹ Please see the Guidance notes section for an explanation of active/passive investments.
