#### Important Information on the Investment Returns

The fund names marked with an + are redacted as they are for the sole use of the employees of specific participating employers in the scheme and it is not appropriate to disclose their name in a publicly available document. If you are an employee of one of these employers the full fund names are available to you via your employers dedicated pension micro site and relevant pension scheme documentation.

Source: Standard Life. All returns shown are cumulative performance using an annual geometric average, with gross income reinvested unless otherwise stated. Fund returns are net of all transaction costs and charges, adjusted for any scheme specific rebates or employer variations.

\* Fund returns noted as "n/a" indicate where fund performance is not available for the specified performance period. This is typically as a result of the fund launching during the specified performance period.

Remember that past performance is not a guide to future returns.

The charging structure applicable to Standard Life's schemes mean that the above Net Investment Returns are applicable to a saving profile of a one off lump sum of £10,000 (as suggested in the guidance) as well as any other premium variations, and do not vary by member age.

The figures run up to and including the year end date based on industry standards.

In addition to the above points, Lifestyle profile Investment Returns have additional important information outlined below:

Where the age shows 55 years old, the 5 year returns are from age 55 to age 60, assuming NRD 65.

Where the age shows 55 years old the 1 year returns are from age 59 to age 60, assuming NRD 65.

Net Investment Returns have been produced for lifestyle profiles. As you get closer to retirement, we automatically move your money into funds that are usually lower risk. The values shown in the tables have been calculated using an annual weighted average approach. This calculation uses the component fund's Net Investment Returns and reflects the automatic movement between funds. We have assumed a retirement age of 65 years' old.
